

WE PROVIDE TOP INDUSTRIAL SOLUTIONS

Innovations to lift you higher!

Cranes that are Built to lift, engineered to last.

ABOUT US

WE PROVIDE TOP INDUSTRIAL SOLUTIONS

Bright Crane Equipment PVT. LTD. is a leading provider of high-quality lifting and material handling solutions. With decades of experience in the industry, we specialize in the design, engineering, and production of advanced cranes and hoisting equipment tailored to meet the diverse needs of our global clientele.

Our Mission: At **Bright Crane Equipment PVT. LTD.**, our mission is to deliver innovative, reliable, and efficient lifting solutions that enhance the productivity and safety of our customers' operations.

Standards Compliance: We adhere to the highest industry standards and regulatory requirements to ensure the safety, reliability, and efficiency of our lifting solutions.

DOUBLE GIRDER EOT CRANE

An overhead crane classified as a double girder EOT crane holds the lifting trolley using two parallel girders. Due to their construction, these cranes tend to be more sturdy and robust than Single girder ones, making them perfect for carrying and lifting big loads.

Due to its ability to effectively tackle heavy lifting and material handling requirements, the **Double Girder Electric Overhead Traveling** (EOT) Crane has grown into a valuable asset in nearly every industrial area.

FEATURES OF DOUBLE GIRDER EOT CRANE

- Capacity : 05 Ton to 150 Tons
- Lifting Heights : As per customer application
- Span : 6 m to 60 m
- Class of Duty : M5, M7, M8 as per
- Standards IS : 3177/807 Also available as per any other applicable international standards.

APPLICATION OF DOUBLE GIRDER EOT CRANE

- Warehousing and Logistics
- Shipbuilding and Repair
- Heavy Manufacturing Industries

USP

Double girder EOT cranes are constructed with premium materials and parts, which means they require less maintenance over time, which lowers operating costs and downtime.

SINGLE GIRDER EOT CRANE

Industrial lifting equipment meant for material handling applications is the single-girder EOT (Electric Overhead Traveling) crane. Loads can be easily lifted, lowered, and moved horizontally with **EOT Cranes** because they have a single horizontal beam carrying a boom and trolley system.

Effective transportation of materials strategies can be achieved even in buildings with low ceilings for loads up to 16 t and spans up to 39 m.

FEATURES OF SINGLE GIRDER EOT CRANES

- Capacity : 01 Ton to 20 Tons
- Lifting Heights : As per customer application
- Span : 3 m to 30 m
- Class of Duty : M5, M7, M8 as per
- Standards IS : 3177/807 Also available as per any other applicable international standards.

APPLICATIONS OF SINGLE GIRDER EOT CRANE

- Metal Fabrication
- Manufacturing
- Assembly Industry
- Foundry

USP

Constructed from high-quality materials, single-girder EOT cranes are built to withstand harsh industrial environments, ensuring a long lifespan and a good return on investment.

WIRE ROPE HOIST

For heavy-duty activities in commercial settings such as factories, warehouses a **wire rope hoist** is a dependable lifting device. With exceptional strength and durability, the wire rope utilized by these hoists has been made from interconnected steel strands.

Precise lifting and lowering of massive loads is made feasible by the hoist mechanism, which consists of a drum, motor, and control system. When compared to different lifting jobs, wire rope hoists are very versatile.

FEATURES OF WIRE ROPE HOIST

- Large, heavy loads can be transported safely and effectively.
- Smooth and consistent lifting capabilities.
- They can be customized to meet various lifting needs.
- Space-Saving Design.
- Enhanced safety feature.

APPLICATIONS OF WIRE ROPE HOIST

- Metal Fabrication
- Manufacturing
- Assembly Industry
- Foundry

USP

Wire rope hoists offer reliable performance and versatility in handling diverse loads and operational requirements, making them a preferred choice for industrial lifting solutions.

CHAIN HOIST

A **chain hoist** is a common industrial and commercial lifting equipment used in manufacturing operations, and warehouses. It is a flexible and reliable lifting instrument.

It elevates and lowers heavy weights precisely and controllably by using a chain coiled around a pulley or drum and operated by an electric motor or by hand. The chain has tremendous resistance to breakdown and long-lasting use.

FEATURES OF CHAIN HOIST

- Manufactured in certified company assured quality & interchangeability of parts.
- Grade 80 load chain higher safety factor & longer chain life.
- Built in electrical control panel ready to use.
- Light weight simple mounting design easy to installation.

APPLICATIONS OF CHAIN HOIST

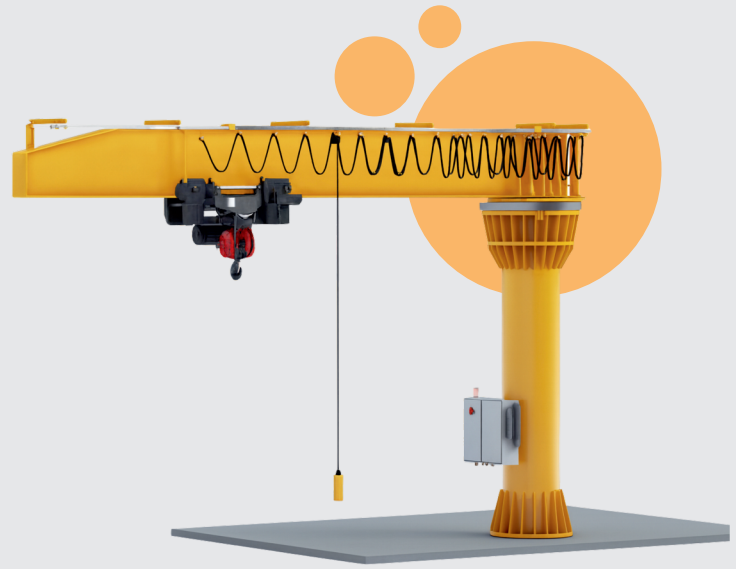

- Span
- 6 Hr Working Space
- Small Manufacturing of Area

USP

Constructed from high-strength alloy steel, chain hoists are built to withstand heavy-duty use and harsh industrial environments, ensuring long-term reliability.

JIB CRANE

For special and constant lifting jobs, smaller work cell spaces frequently employ **jib cranes**, one of the best overhead lifting equipment. Because of its exceptional versatility, jib cranes can be used in combination with overhead bridge cranes to increase output.

FEATURES OF JIB CRANE

- Versatility in Lifting Applications
- Space-saving design
- 360-Degree Rotation Capability

APPLICATIONS OF JIB CRANE

- Manufacturing, Warehousing & Logistics, Workshops & Maintenance Shops

USP

Available in different sizes, capacities, and arm lengths, with options for motorized rotation and various hook or attachment types to meet specific lifting requirements.

GOLIATH / GANTRY CRANE

A **Goliath / Gantry** is a steel framework that usually covers an area of a loading bay, factory, or workshop. It may be placed very much anywhere that has sufficient room, a head height, and a solid work surface.

FEATURES OF GANTRY CRANE

- The ultimate symbol of versatility.
- Quickest cranes for moving big items.
- They offer customizable configurations.

APPLICATIONS OF GANTRY CRANE

- Shipping Yards
- Manufacturing Facilities
- Outdoor Area
- Warehousing
